

# Anchoring clamps for figure-8 ACD

## Description

**Anchoring clamps for figure-8 cables with dielectric or AAA messengered cables** are made of one opened conical body, a pair of tapered thermoplastic jaws and a flexible bail. All parts are secured together to prevent any loss of parts. These anchoring clamps allow an easy and quick installation of figure-8 cables with all aluminium alloy(AAA) or dielectric messengers ( Kevlar,FRP) by gripping directly onto the HDPE or MDPE messenger outer sheath.

## Application

Overhead data communication lines.

## Properties

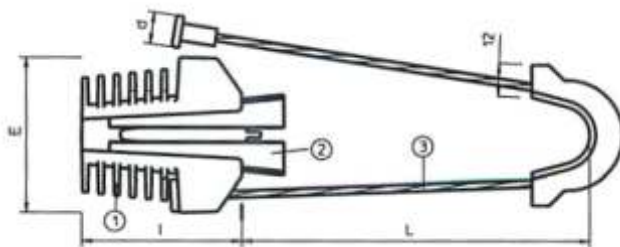

Claamp reference	Messenger diameter over insulation (mm)	Installation load (daN)	Weight [kg]	Body (1)	Jaws (2)	Bail (3)	L [mm]	l [mm]	E [mm]	d [mm]
ACD 35 260	3 - 5	300	0,11	UV protected thermoplastic	UV protected thermoplastic	Stainless steel	260	55	53	11
ACD 68 260	6 - 8	300	0,11	UV protected thermoplastic	UV protected thermoplastic	Stainless steel	260	55	53	11
